

# SPR10

## Rotary Concrete Spraying Machine

The **SPR-10** is the most adaptable SPICON rotary machine for spraying concrete! With the **SPR-10**, processing dry or wet mixes in small or medium volumes is possible. We now offer the **SPR-10** with rubber sealing plates in addition to the extremely durable steel sealing plates. We advise using rubber sealing plates for low-wear concrete spraying, particularly for dry mixtures. Thanks to the dependable spicon machine quality and superior original spicon spare parts, economical spraying operations with short standstill times and the lowest wear costs are now achievable.

Its unique machine design and versatility in the thin-stream process allow you to spray dry or wet mixtures with this incredibly sturdy and small rotary shotcrete machine. We notably suggest the **SPR-10** with the rubber sealing plates for dry spraying with the least amount of damage.
